Subject: Surety Release Check Enclosed, Integrity Remodeling and Construction, Palmer Helsten Mine, S/049/0057, Utah County, Utah

Dear Mr. Helsten:

Please find enclosed with this letter a check in the amount of \$2,053.03. This check is for full release of the surety for the Palmer Helsten Mine.

Thank you for your cooperation in completing this reclamation work.

Sincerely,

Paul B. Baker
Minerals Program Manager

---ooOoo---

SMALL MINE RECLAMATION CONTRACT

This Reclamation Contract (hereinafter referred to as "Contract") is entered into between **Integrity Remodeling & Construction Inc.** the "Operator" and the Utah State Division of Oil, Gas and Mining ("Division").

WHEREAS, Operator desires to conduct mining operations under Notice of Intention (NOI) File No. **S/049/057** which the Operator has filed with the Division and has been determined by the Division to be complete (Complete NOI) as required by the Utah Mined Land Reclamation Act, Sections 40-8-1 et seq., Utah Code Annotated, (2005, as amended) (hereinafter referred to as "Act") and the regulations adopted pursuant to the Act; and

WHEREAS, Operator is obligated to reclaim the lands affected by the mining operations in accordance with the Act and the regulations, and is obligated to provide a surety in a form and amount approved by the Division or the Board of Oil, Gas and Mining (Board) to assure reclamation of the lands affected by the mining operations.

NOW, THEREFORE, the Division and the Operator agree as follows:

1. Operator agrees to promptly reclaim in accordance with the requirements of the Act and applicable regulations, as they may be amended, all of the lands affected by the mining operations conducted or to be conducted pursuant to a Complete Notice of Intention.
2. The Lands Affected by the mining operations and subject to the requirements of the Act and this Contract include:
 - A. All surface and subsurface areas affected or to be affected by the mining operations including but not limited to private on-site ways, roads, railroads; land excavations; drill sites and

workings; refuse banks or spoil piles; evaporation or settling ponds; stockpiles; leaching dumps; placer areas; tailings ponds or dumps; work, parking, storage, and waste discharge areas, structures, and facilities; and

- B. All mining disturbances regardless of discrepancies in the map and legal description, unless explicitly and clearly identified as EXCLUDED on maps, and legal descriptions included in the Complete NOI; provided lands may be excluded only if: (1) they were disturbed by mining operations that ceased prior to July 1, 1977; (2) the lands would be included but have been reclaimed in accordance with a complete notice or reclamation plan; or (3) the lands were disturbed by a prior operation for which there is no surety, no legally responsible entity or person, and which lands are not necessarily or incidentally intended to be affected by the mining operations as described in the Complete NOI.

☒ **APPROVED**

3. The Operator shall be responsible for reclamation of all such Lands Affected regardless of errors or discrepancies in the maps or legal descriptions provided with the NOI which are intended to assist in determining the location of the mining operations, to describe the areas of disturbance, and to assist estimating the amount of surety required.
4. The Operator prior to commencement of any mining operations and as a precondition to the rights under the Notice of Intention shall provide a surety in a form permitted by the Act and in an amount sufficient to assure that reclamation of the Lands Affected will be completed as required by the Act. The Surety shall remain in full force and effect according to its terms unless modified by the Division in writing. A copy of the agreement providing for the Surety for the reclamation obligations herein is included as **ATTACHMENT A** to this Contract.
5. If the Surety expressly provides for cancellation or termination for non-renewal:
 - A. The Operator shall within 60 days following the Division's receipt of notice that the Surety will be terminated or cancelled, provide a replacement Surety sufficient in a form and amount, as required by the Act, to replace the cancelled surety; or
 - B. If the Operator fails to provide an acceptable replacement Surety within 60 days of notice of cancellation or termination, the Division may order the Operator to cease further mining activities, and without further notice proceed to draw upon letters of credit, to withdraw any amounts in certificates of deposit or cash and/or any other forms of surety, and to otherwise take such action as may be necessary to secure the rights of the Division to perfect its claim on the existing surety

for the purpose of fully satisfying all of the reclamation obligations incurred by the Operator prior to the date of termination, and the Division may thereafter require the Operator to begin immediate reclamation of the Lands Affected by the mining operations, and may, if necessary, proceed to take such further actions as may be required for the Division to forfeit the surety for the purpose of reclaiming the Lands Affected.

6. The Operator's liability under this Contract shall continue in full force and effect until the Division finds that the Operator has reclaimed the Lands Affected by mining operations in accordance with the Act and regulations, as amended. If the mining operations are modified or for any other reason vary from those described in the Complete Notice of Intention, the Operator shall immediately advise the Division, and the Notice of Intention shall be revised and the Surety amount shall be adjusted as necessary.
7. If reclamation of a substantial phase or segment of the Lands Affected by the mining operations is completed to the satisfaction of the Division, and the Division finds that such substantial phases or segments are severable from the remainder of the mining area, Operator may request the Division to find that Operator has reclaimed such area. If the Division makes such finding, Operator may make request to the Division for a reduction in the aggregate face amount of the Surety, and the Division may reduce the surety to an amount necessary to complete reclamation of the remaining mining operations as anticipated by the Complete Notice of Intention in accordance with the requirements of the Act and regulations, as amended.
8. Operator may, at any time, submit a request to the Division to substitute surety. The Division may approve such substitution if the substitute surety meets the requirements of the Act and the applicable rules.
9. Operator agrees to pay all legally determined public liability and property damage claims resulting from mining operations, to pay all permit fees, to maintain suitable records, to file all required reports, to permit reasonable inspections, and to fulfill all sundry reporting requirements applicable to the mine as required by the Act and implementing rules.
10. Operator agrees to indemnify and hold harmless the State, Board, and the Division from any claim, demand, liability, cost, charge, suit, or obligation of whatsoever nature arising from the failure of Operator or Operator's agents and employees, or contractors to comply with this Contract.
11. If Operator shall default in the performance of its obligations hereunder, Operator shall be liable for all damages resulting from the breach hereof including all costs, expenses, and reasonable attorney's fees incurred by the Division and/or the Board in the enforcement of this Contract.

☒ **APPROVED**

12. Any breach of a material provision of this Contract by Operator may, at the discretion of the Division, in addition to other remedies available to it, result in an order by the Division requiring the Operator to cease mining operations, and may thereafter result in an Order, subject to an opportunity for notice and hearing before the Board, withdrawing and revoking the Notice of Intention, and requiring immediate reclamation by the Operator of the Lands Affected or forfeiture of the Surety.
13. In the event of forfeiture of the Surety, Operator shall be liable for any additional costs in excess of the surety amount that is required to comply with this Contract. Upon completion of the reclamation of all of the Lands Affected, any excess monies resulting from forfeiture of the Surety shall be returned to the rightful claimant.
14. The Operator shall notify the Division immediately of any changes in the Operator's registered agent, the Operator's address, form of business, name of business, significant changes in ownership, and other pertinent changes in the information required as part of the Notice of Intention. Notwithstanding this requirement, any changes to the Notice of Intention, and any errors, omissions, or failures to fully or accurately complete or update the information on the Notice of Intention, or the attached maps, shall not affect the validity of this Contract and the rights of the Division to enforce its terms.
15. If requested by the Division, the Operator shall execute addendums to this Contract to add or substitute parties, or to reflect changes in the Operator, Surety, and otherwise modify the Contract to reflect changes in the mining operations as requested by the Division. All modifications must be in writing and signed by the parties, and no verbal agreements, or modifications in any of the terms or conditions shall be enforceable.
16. This Contract shall be governed and construed in accordance with the laws of the State of Utah.

The signatory below represents that the Operator, if not a natural person, is a properly organized entity in good standing under the laws of Utah and the United States, is registered as an entity authorized to do business in the State of Utah, and that he/she is authorized to execute this Contract on behalf of the entity as Operator.

Subject: Authorization for Release of Cash Deposit, Held by Utah State Treasurer, Release Amount \$1,500, Account number [redacted], Integrity Remodeling and Construction Inc., Palmer Helsten Mine, S/049/0057, Utah County, Utah

Dear Ms. Hackwell,

The Utah State Treasurer is presently holding funds in the amount of \$1,500, for the benefit of the State of Utah, Division of Oil, Gas and Mining as a form of reclamation surety for Integrity Remodeling and Construction, Inc. Palmer Helsten Mine.

The Division hereby requests the total release of funds in the amount of \$1,500.00 plus interest. Please make check payable to Integrity Remodeling and Construction Inc. and remit the funds directly to the Division, attention: Minerals Regulatory Program.

If you have any questions or require further discussion regarding the content of this letter, please contact the Division, telephone (801) 538-5291 or email bondcoordinator@utah.gov.

Sincerely,

Dana Dean, P.E.

Setting and Premining Environment

This site is located approximately 5 miles south of Elberta, Utah, in Utah County. Prior to mining, the area was open rangeland (undeveloped) along the foothills of the tinctic mountains. The area was relatively flat with no perennial drainages and less than 5% slope. Prior to a wildfire that burned through this area in 2005, the site was dominated by scattered sagebrush and cheatgrass. Even though the area had been seeded (fire mitigation), the vegetation prior to mining was virtually 100% cheatgrass.

Operations

This operation removed building stone (landscape rock) from the top 3-4 feet using a track hoe excavator and loading material into haul trucks. There was no surface facilities at this site. By November of 2006, the desirable rock had been removed and the entire site was reclaimed.

Reclamation

Reclamation consisted of regrading the site (left in a roughened condition to aid in water retention and erosion control) and seeding. The seed mix included a mix a grasses, forbs and shrubs desirable for grazing and wildlife habitat (the exact seed mix is unknown).

Mine Engineering

Public Safety: There are no high walls or other related surface hazards at the site. the area was regraded to approximate original contour (left in roughened condition as described above). There are no hazardous or deleterious materials on site.

Slopes and Highwalls: There are no highwalls or slopes greater than 4h:1v.

Hydrology

Drainages: There are no defined drainage channels on the permit area. Since regrading efforts left a roughened surface, the area is stable with no signs of erosion.

Dams, Impoundments, Trenches, and Pits: There are no dams, impoundments or pits left on the site

Roads: A pre-existing 2-track road to access the property remains on site.

Revegetation

Postmining landuse. The approved post mining land use for this area is grazing and wildlife habitat. Vegetation has established with includes sagebrush, rabbit brush, forage kochia intermediate wheatgrass, thickspike wheatgrass, and sunflower. Cheat grass has not re-invaded the seeded areas.

Revegetation: The area was seeded using broadcast seeding methods in November of 2006. Desirable vegetation has established with a ground cover of 35% (desirable species). Since this area is in the middle of a recent wildfire that burned hundreds of acres (in August of 2005), the premining vegetation cover (or the adjacent area) is not available. Outside the burned area, to the east is irrigated cropland, to the west is transition into a pinyon-juniper woodland (with a marked increase in slope). Currently the area is stable and desirable vegetation has established and would be expected to increase in density. During the recent inspection, sheep were observed grazing in the reclaimed area.

Recommendation

The entire mine site has been reclaimed. All reclamation work required has been completed. The estimated 35% ground cover is believed to be at least 70% of the premining vegetation cover (for this vegetation type, it is expected to have been between 40-50% cover). It is therefore recommended that the Division approve the request for full release in the amount of \$1,500.00 plus interest.

Note: The site was last inspected on May 4, 2009.

10. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Purpose of Inspection:

Verbal request by operator to evaluate reclamation success.

Inspection Summary:

The reclamation work at this site was completed in November 2006. This is the third growing season. so revegetation success was evaluated. The regrading, public safety, removal of trash, debris and deleterious materials was previously evaluated and accepted.

Vegetation is well established on the site. dominant species include forage kochia, rabbitbrush, sagebrush, crested wheatgrass, thickspike wheatgrass. Minor species observed included palmer penstemon and sunflower. Results of 10 point intercept transects within the revegetated area show ground cover of desirable species at 40%. Desirable species ground cover on the adjacent, undisturbed areas ranged from 5- 10% Cheatgrass and other annual weeds made up about 50% ground cover. The vegetation meets the 70% ground cover success standard.

Photos were taken to document site conditions.

Conclusions and Recommendations:

Upon receipt of the written request, the Division can release the surety in full and close this file.

Date: 4/2/2009 8:34 PM
Subject: Re: Palmer Helsten S0490057

Did he send a site release request or just call? The site was seeded the fall of 2006. 2009 is the third growing season. I don't think we can release this until about August, assuming the vegetation is still there. I will give him a call and let him know. I am also forwarding this to both of you so you are aware of what I tell him and don't give him a different story.

>>> Penny Berry 4/2/2009 9:53 AM >>>
Hi Lynn,

I rec'd a call from Palmer asking if he could get the rest of his bond (\$1500). I spoke with Paul, he said it was possible that the site has vegetation, but it will be your call because you know the area. Please give Palmer a call at 801-898-2714. Thanks.

August 7, 2006

TO: File

From: Lynn Kunzler, Senior Reclamation Specialist

RE: Reclamation Surety, DJN Corp. Proposed Operations in Utah County.

I have evaluated the proposed operations as discussed with Todd Anderson (operator) for his proposed new stone quarry located south of Elberta, Utah, in Utah County.

As described, disturbances will consist of removal of rock from the surface, or near surface (up to about 10 feet as observed from neighboring quarries). When excavating, overburden materials are piled next to the hole where a Dozer can easily push the material back into the hole. There will be no highwalls or waste piles that will need to be regraded. This is very similar reclamation to that of the Elite Rock West and the Flower Patch Quarries where the reclamation surety was calculated to be \$10,000.00 for a 5-acre permit area at each site.

I propose that this same amount be used for this proposed operation as well.
